OUR SOCIAL COMMITMENT

Our name carries it all—the two meanings of “Foresight” have driven us from day one: Foresight for our planet and society, to operate the lodge sustainably, and to pay employees fairly. And also the desire to build a school with the income from the lodge. A school that provides children from poor backgrounds with a good education, giving families a chance to lift themselves out of extreme poverty.

FORESIGHT'S VISION FOR THE FUTURE

Since the idea to establish our lodge originated in a Primary School in Tanzania, and since we believe that education is an essential key out of poverty, Foresight's future is focused on building and operating its own school.

When it comes to directly supporting a government school with in-kind and monetary donations, our hands are severely tied. It is not possible to track the exact amount of money donated, and we are not entitled to any rights in the organization or management of the school. In addition, in the course of two years of cooperation with a primary school, we have experienced and learned where operational and structural changes need to take place. This is only possible with a self-owned school.

OUR OWN SCHOOL

Our idea of a suitable school system for the children in Tanzania is based on the Montessori principle. We want to maintain and promote the independent motivation for learning in the students by encouraging them to become active themselves and to work out their strengths. Education should be holistic and our goal is students who are open-minded, confident and able to think outside the box. Our school offer will be free of charge and will predominantly serve children from poor families from the region.

In order to have fun and energy in the school day, a healthy diet is essential, which means that we will provide a balanced lunch for students and teachers. Furthermore it is very important to us to hire good teachers with the appropriate skills and the necessary foresight. We want the teaching profession to have the prestige it deserves—we want our teachers to be role models for the students and the surrounding community. Because we want to make a lasting difference!

NEXT MILESTONE

Only 14 months after our founding, we have now taken a big step forward in our social commitment: We found the perfect plot of land for our own school very close to the lodge. We can provide a part of the necessary capital for the purchase from the income of the lodge.

And there is more good news, because with WATOYO Tanzania e.V. we finally have a reliable partner at our side, who as a non-profit organization collects donations for our project and can issue corresponding donation receipts. In order to be able to buy the land now, we still need donations that you can make directly through WATOYO for our school project.

Donate now

Please indicate at
"I donate for":
"02_Foresight School
in Karatu".

**All donations will reach 100 % the project.
Thank you for your donation! Together we
can make a difference for the better.**

EXPERIENCE SOMETHING SPECIAL

The Foresight Eco Lodge is beautifully situated nestled in nature at 1650 meters above sea level. The Ngorongoro National Park is not far away and from the lodge you have a fantastic view of the Ngorongoro jungle and towards the south over the impressive vastness of the country around Karatu.

Through our social engagement we inspire the hotel guests to become active themselves. This is shown by donations in kind or money as well as by our own engagement at the school.
